RE: Maximum output power of Masport R10000 heater.

Client:

Attention: Mr. Andrew Weir.
Company Name: Glen Dimplex New Zealand Ltd.
Company Address: P.O. Box 58-473 Greenmount, Auckland.
Phone: 09-274-8625.
Manufacturer: As above.

Test Date: 19th August 2013.

Instructions:

The client requested That the Masport R10000 be operated in the calorimeter test chamber to establish the maximum power an operator would be able to establish.

AS/NZS4012 was used to calculate the power output, the test engineer loaded the fuel as dictated by the output power reading to achieve the highest stable output.

Result:

The average maximum power output for the R10000 was 25.3 kw over a period of 30 minutes.

The peak instantaneous observed power output was 26.4 kW.

A handwritten signature in blue ink, appearing to be "P. Sparrow", is written over a horizontal dotted line.
