

# ESSE Cooker

## Specifications

- Heat Output:** Average output when cooking temperature 6.1k/W
- Efficiency:** 72% (Seasoned Wood)
- Fuel capacity:** The Firebox has a capacity of 38.5 litres  
**Note:** This can be reduced to maintain a smaller fire when used continuously by setting the movable coal bar further back. This will also reduce the temperature in the front of the firebox window.
- Floor Protector:** Standard Hearth to AS/NZ 2918 acceptable (Insulated hearth not necessary)
- Kettle boil Test:** 1.5 Litres in 6mins (under maximum boiling conditions)
- Oven Capacity:** The single large oven has a capacity of 49 litres
- Fuel types:** Seasoned wood and approved coal
- Fuel Consumption:** Seasoned wood 4 lbs per hour
- Clearance Required:** \*Normal Orientation:  
Side clearance: 200mm from combustible material  
Rear clearance: 150mm (measure from rear panel)
- \*Corner Orientation:  
Corner clearance 75mm from combustible material

**Please Note:** Clearance Test undertaken with exposed flue therefore flue shield not required.
